CLIENT BRIEF

Play & Win mobile web-app

CLIENT
Harbour Point Community Club

EVENT
FunFest @ Downtown West

What we want

We want a mobile web-app for a family-friendly event that:

- Lets players choose one of **two** games:
  - A quiz: 5 questions with 2 answers each.
  - A mini-game where players can collect points to win.
- Players win if they score at least **80%**: **4 of 5** quiz questions correct, or at least **80%** of the maximum points in the points game.
- Winners show a simple final screen to our staff to collect a prize.

Data to collect (using your company's database)

- Total amount of players
- Which game players picked
- Game stats for each game:
  - Total wins
  - Total losses
- Total page views for the final screen
